- Constraints
- Queries
- Forms
- Reports

TOPIC

- What the Project is about?
  - A movie database that contains various details related to movies
- Why this project?
  - Find movie that best suits a user's preferences
- Why is this database necessary?
  - Helps users find movies efficiently by giving various choices to give specific results
- How did we populate the Database?
  - Used www.imdb.com and searched for movies using their search engine.
