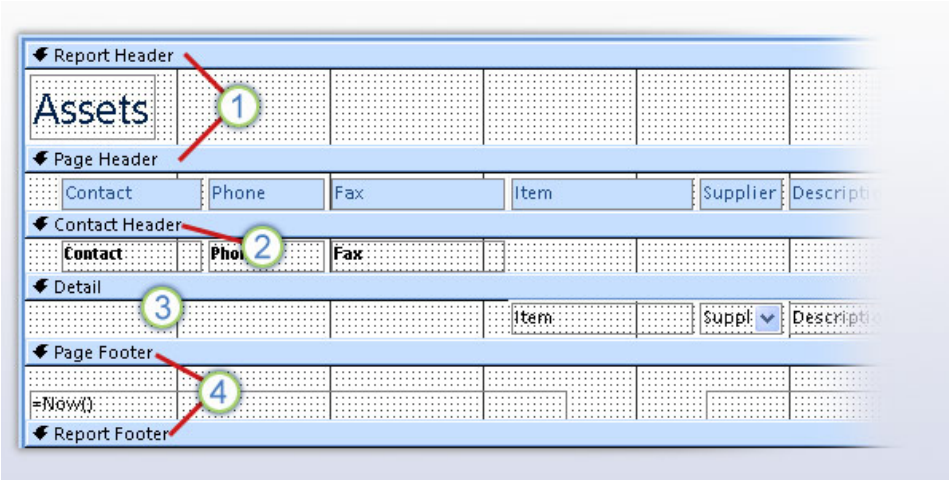
Hierarchical Reports

- A good way to format and print your Access data
- Use nesting (or indentation) to provide a visually appealing layout
- Includes sub-totals
- Vocabulary
  - Group: sorted field; usually indented
  - Detail line: innermost field

Complex reports are an important part of your project grade – be sure you develop complex reports (e.g., sub-totals, grouping)

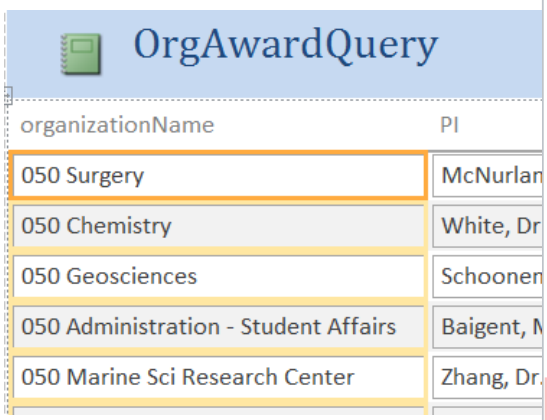
Report Components

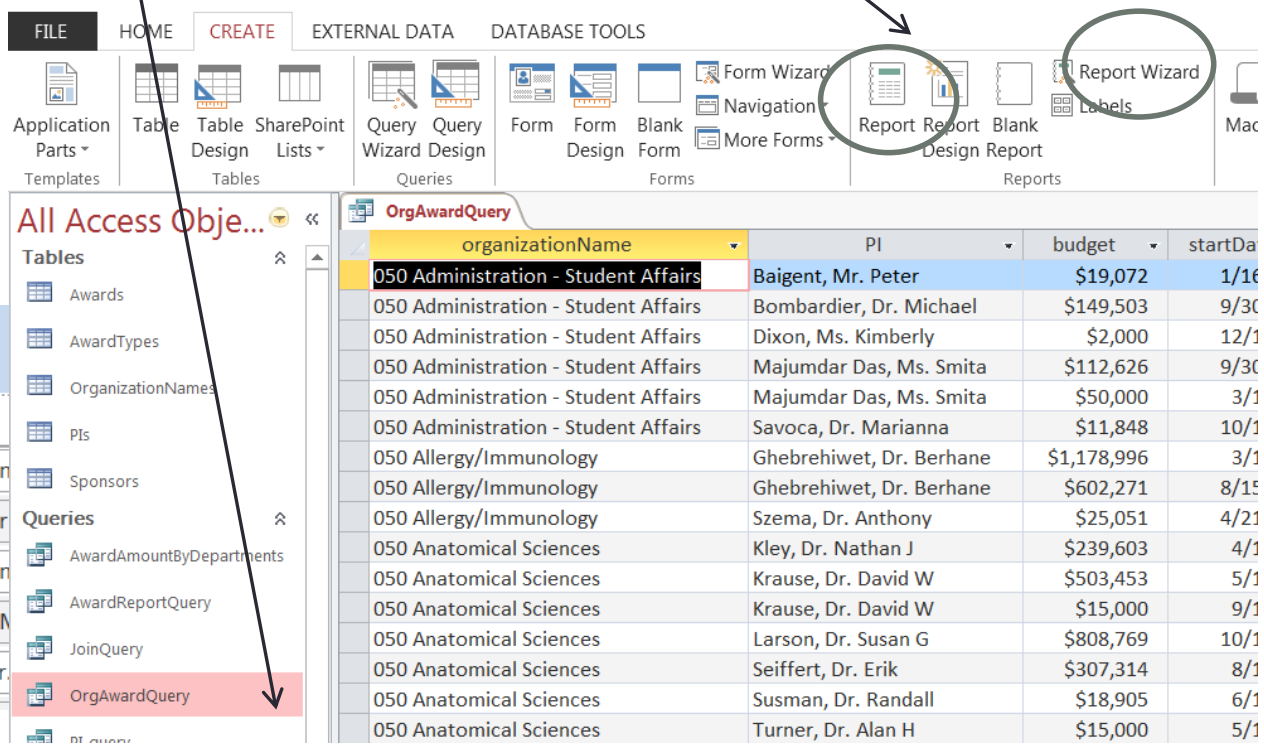


- Report sections
  - Report header
  - Page header
  - Group header
  - Detail
  - Page footer
  - Report footer
- Report layouts
  - Tabular – resembles a spreadsheet
  - Stacked – report contains too many fields for tabular
  - Mixed

Creating a Report

- Select a table or query as your data source
- Click Create tab, Reports group, click Report or Report Wizard
- Report is in tabular form with all fields





Report Wizard

- Specify
  - Grouping
  - Sorting
- Results might not display perfectly
- Use Design View to modify report
