

ISE 312 – Project Instructions

Legal, Social, and Ethical Issues in Information Systems

Project Overview

Students will work in groups of 2 - 3 students to analyze a current event or real-world case related to legal, social, and ethical issues in information systems.

The objective of this project is to apply course concepts such as:

- Intellectual Property
- Freedom of Speech
- Privacy and Confidentiality
- Digital Rights Management (DRM)
- Professional Ethics and responsibilities of computing professionals
- Errors, Failures, and Risks in computer systems
- Evaluating the impact of technology on society
- AI ethics and bias
- Cybersecurity and data protection

Students must demonstrate both legal understanding and ethical reasoning using course concepts.

Team Requirement

- Each group must have exactly 2 - 3 students
- Each group member must actively participate

Each student must clearly explain their individual contribution during the presentation.

Project Timeline (3 Phases)

Phase 1 – Topic Selection and Outline

Deadline: June 01

Students must submit a **1-page document** describing the project idea.

Deliverable for Phase 1 (1 page)

- Project title
- Description of the topic (1 paragraph)
- Why this issue is important today
- Legal issue involved
- Ethical issue involved
- At least 2 references

Format

PDF or Word document

Maximum 1 page

Phase 2 – Final Submission

Deadline: June 23

Students must submit the final version of the project materials.

Deliverables

- Final presentation slides (5–7 slides)
- Final analysis of legal and ethical issues
- References must be included in slides

Slides submitted without references will NOT be accepted.

Slides should be clear, concise, and professionally formatted.

Phase 3 – Presentation in Class**Presentation Date: June 26 and July 3**

Students will present their work in class.

Presentation Requirements

- 5 minutes presentation time per group
- Both students must present
- Students must clearly explain their contribution

Students should be prepared to answer questions related to:

- Legal impact
 - Ethical concerns
 - Risks and benefits
-

Required Slide Structure

Slide 1 – Title Slide

- Project title
- Student names
- Course name (ISE 312)

Slide 2 – Background

- Overview of the issue
- Why it is important today

Slide 3 – Legal Issues

Examples:

- Intellectual property
- Copyright
- Privacy law
- Liability
- Regulation

Slide 4 – Ethical Issues

Apply concepts such as:

- Professional responsibility
- Harm to society
- Fairness and bias
- Risk and safety

Slide 5 – Analysis

- Stakeholders affected
- Risks vs benefits
- Possible solutions

Slide 6 – Team Contribution

Each student explains:

- What they contributed
- What they learned

Slide 7 – Conclusion

- Key takeaway
 - Future impact of technology
-

Example Topics

Students may select topics such as:

- AI bias in hiring decisions
 - Copyright issues with Generative AI
 - Privacy concerns with social media
 - Cybercrime and ransomware attacks
 - Self-driving car liability
 - Facial recognition ethics
 - Software failures and responsibility
 - Digital divide and technology access
 - Intellectual property in software
 - Ethical use of AI in healthcare or finance
-

Grading Criteria (100 points)

Criteria	Points
Topic relevance	20
Legal analysis	20
Ethical analysis	20
Research quality	15
Presentation clarity	15
Individual contribution explanation	10
