AMS315 Lab 1 (StatPlus)

1. Requirement

Referring to help file of StatPlus (available in MS Teams), run the procedure (Steps 1-9) until you get the following results:

	A	B	C	D
84	**Variable #3 (Low)**			
85	*Count*	34	*Mean Deviation*	28.14187
86	*Mean*	87.66176	*Second Moment*	1,226.52942
87	*Mean LCL*	75.2583	*Third Moment*	24,987.24411
88	*Mean UCL*	100.06523	*Fourth Moment*	3,845,689.04489
89	*Variance*	1,263.69698		
90	*Standard Deviation*	35.54852	*Sum*	2,980.5
91	*Mean Standard Error*	6.09652	*Sum Standard Error*	207.28169
92	*Coefficient of Variation*	0.40552	*Total Sum Squares*	302,977.89
93			*Adjusted Sum Squares*	41,702.00029
94	*Minimum*	30.1		
95	*Maximum*	168.7	*Geometric Mean*	80.7553
96	*Range*	138.6	*Harmonic Mean*	74.00763
97			*Mode*	55.4
98	*Median*	80.95		
99	*Median Error*	1.3104	*Skewness*	0.5817
100	*Percentile 25% (Q1)*	57.	*Skewness Standard Error*	0.39102
101	*Percentile 75% (Q3)*	105.25	*Kurtosis*	2.55634
102	*IQR*	48.25	*Kurtosis Standard Error*	0.71772
103	*MAD (Median Absolute Deviation)*	28.2	*Skewness (Fisher's)*	0.6089
104	*Coefficient of Dispersion (COD)*	0.34448	*Kurtosis (Fisher's)*	-0.31697
125	**Variable #4 (Lower middle)**			
126	*Count*	49	*Mean Deviation*	26.07522

Then, find a dataset consisting of at least 50 data points. Repeat the nine steps above and present your output as a screenshot in a new document. Next, briefly describe the statistics of the dataset that you obtain. Finally, try to describe an insight (one important information) from the dataset.

2. Submission

Please submit only one page, in one pdf document. The number words written should be within 300 words.

3. Marking

The following scoring system will be applied: 4 (Excellent), 3 (Satisfactory), 2 (Average), 1 (Poor), and 0 (Fail). A score of 4 (Excellent) will be reserved for to submissions that demonstrate exceptional quality, as determined at the instructor's discretion.

4. Deadline

The deadline of this assignment is by the end of Wednesday.
