ISE 333: User Interface Development (Design)

Chapter 14: Documentation and User Support

Spring 2026

Instructor: Hao Li

Introduction

- Why Having Documentation?

- Enabling usage

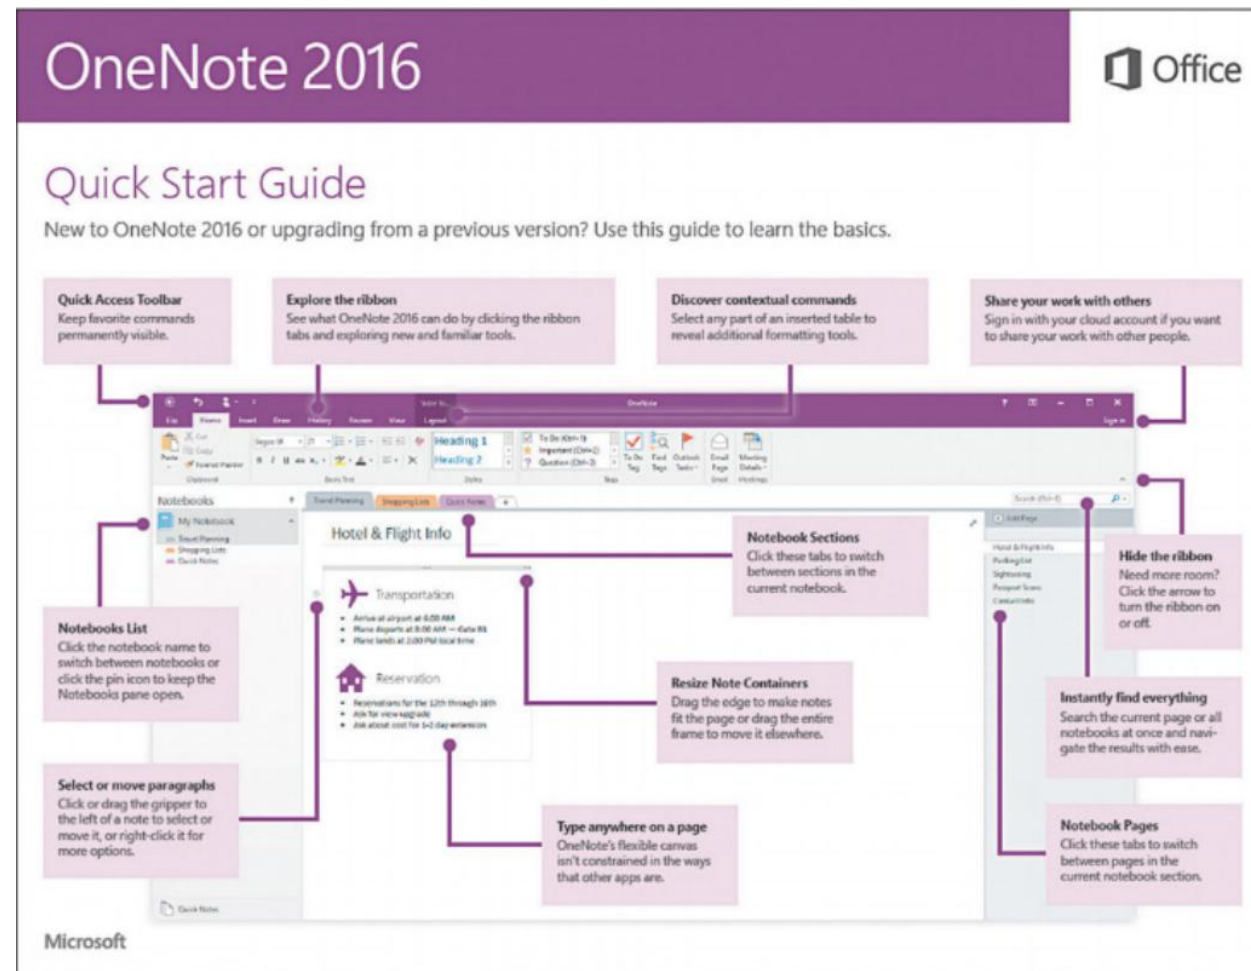

- Standardization and improvements in UIs have made them easier to use, but using new UIs is still a challenge
 - In fact, learning anything new is a challenge
 - Studies have shown that well-written and well-designed user manuals, on paper or online, can be effective, yet today's users show little interest in detailed manuals
 - Today's UIs are expected to provide everything online, supplemented by quick-start guidelines and interactive tutorials that serve user needs for training and later on for continued reference

- Societal consideration

- How new UIs are intended to be used may not be self-evident
 - Can guide users into intended usage of UIs for sake of avoiding unexpected societal consequences
 - Implicit law-level disclaimer

Principles

- A Special Kind of UI Itself
 - Display designs
- Shaping Documentation Content

Principles

- Shaping Documentation Content

Migration Process

Tables Relationships TOs Value Lists CFs Layouts Scripts GUI

Table Consolidation

Tables: 5

Instructions:

Step 2:
Import Layouts from FileMaker Advanced database(s).

Click the Layouts tab, click the Layout Batch Import button.

Step 3:
Click the Scripts tab.

Select all of the ScriptMaker Scripts within FileMaker Advanced, copy to clipboard.

Click the Add Scripts button to copy the scripts from the

Original Table	New Table	Source	Destination	Fields	Records
Contacts		FileMaker 14	FileMaker 14	56	
Members		FileMaker 14	FileMaker 14	17	
tbl_Assets	tbl_assets	FileMaker 14	FileMaker 14	70	3
tbl_Maintenance_Record		FileMaker 14	FileMaker 14	29	
tbl_Value_List_Data_Item	tbl_value_list_data_item	FileMaker 14	FileMaker 14	2	2

Fields: 70

ID	Original Fieldname	PK	Auto-Increment	Next SN	New Fieldname
1	ID	1	1	5	id
2	Model	0	0		model
3	Item	0	0		item
5	Category	0	0		category
7	Cost	0	0		cost

Step 2
Get Layouts
Completed

Step 3
Get Scripts
Completed

Step 4
Get Relationships
Completed

Step 5
Remap Objects
In Progress

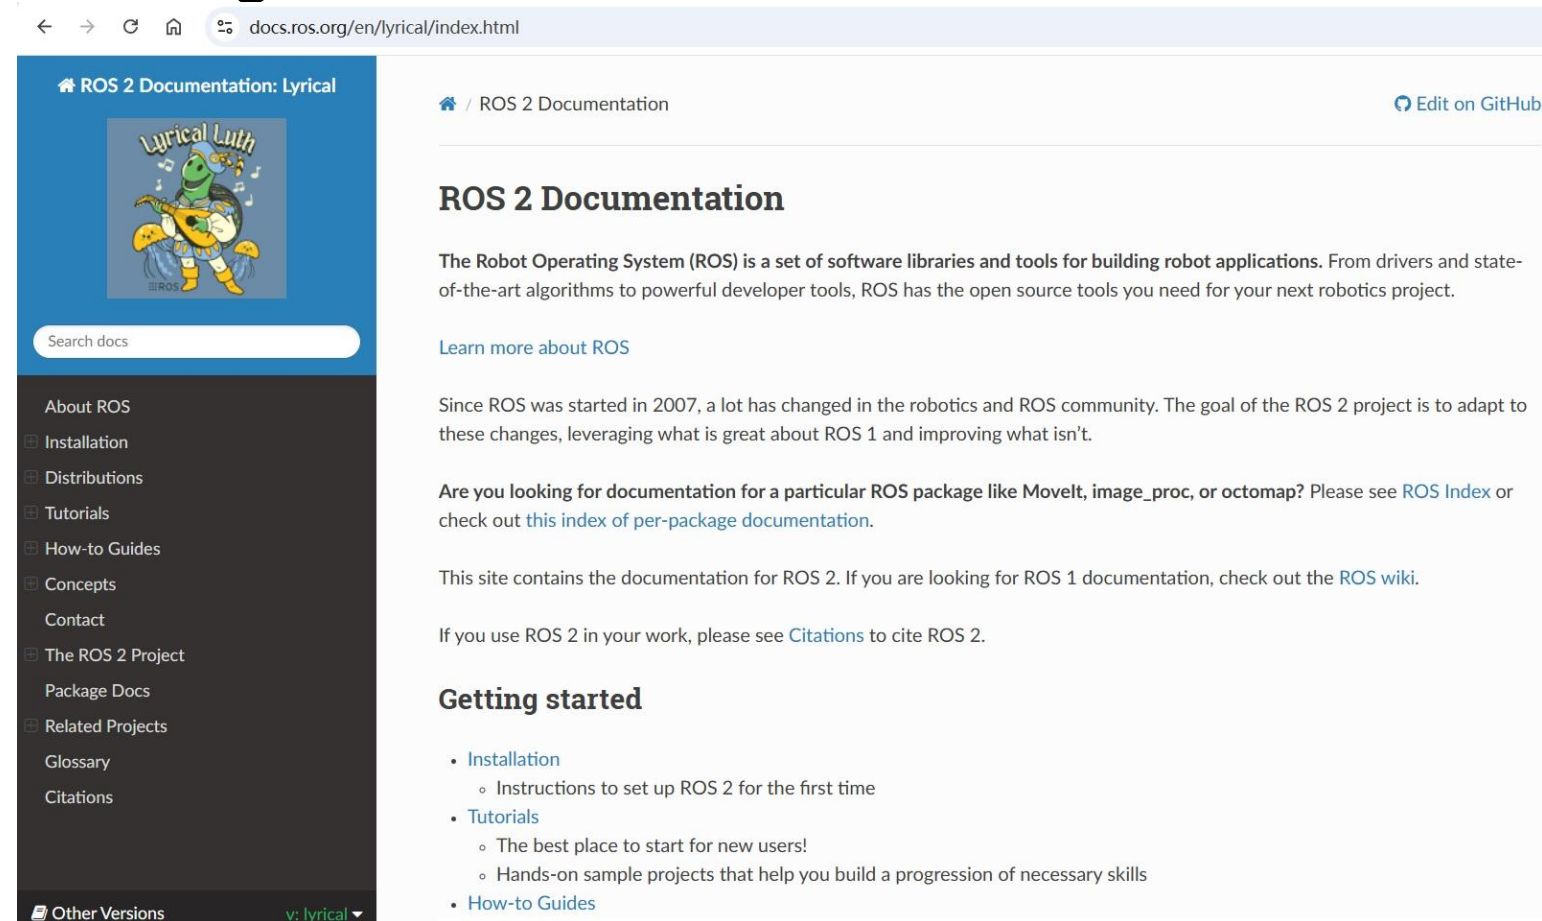

Step 6
Create CFs, Tables, Table Occurrences
Not Started

Step 7
Create Value Lists, Scripts and Layouts
Not Started

Step 8
Create Data Import Scripts
Not Started

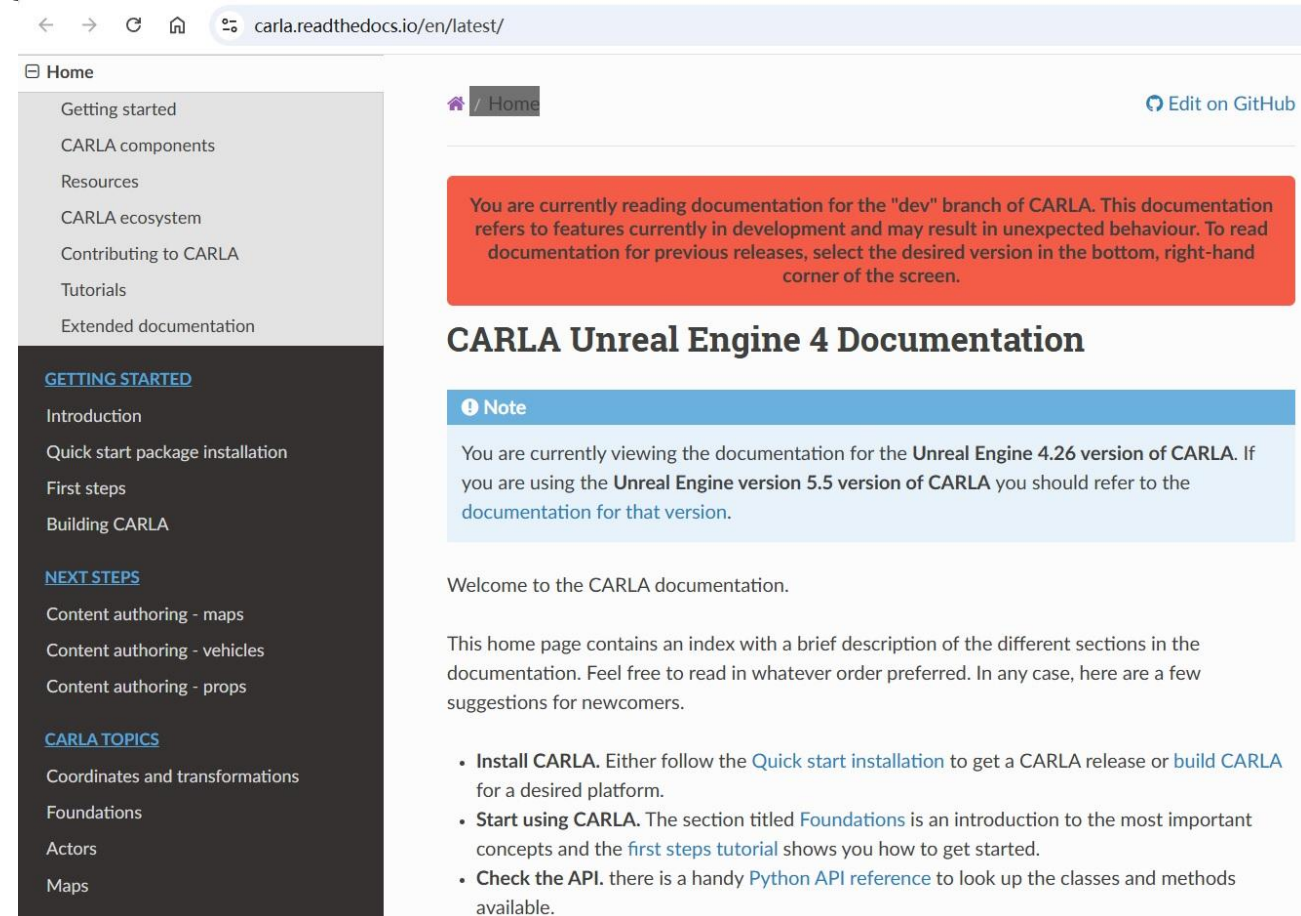

Principles

- Shaping Documentation Content
- Flexible and Convenient Accessing
 - Online documentation

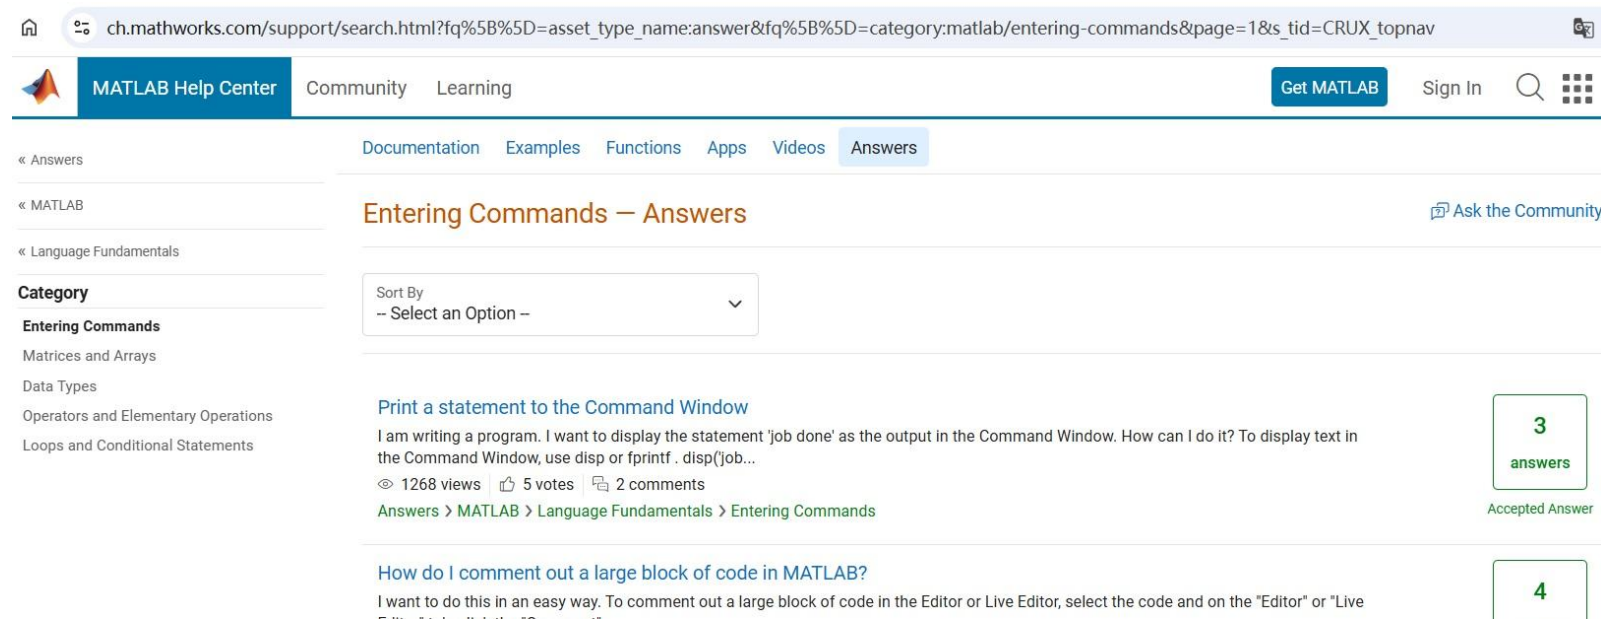

Principles

- Shaping Documentation Content
- Flexible and Convenient Accessing
 - Online documentation

Principles

- Shaping Documentation Content
- Flexible and Convenient Accessing
 - Online documentation
 - Online help
 - Users typically seek out help in solving specific problems and will want to go directly to the information that is needed

The screenshot shows the MATLAB Help Center search results page. The URL in the browser is `ch.mathworks.com/support/search.html?fq%5B%5D=asset_type_name:answer&fq%5B%5D=category:matlab/entering-commands&page=1&s_tid=CRUX_topnav`. The page has a navigation bar with 'MATLAB Help Center', 'Community', and 'Learning' links. A 'Get MATLAB' button and 'Sign In' link are also present. Below the navigation bar, there are tabs for 'Documentation', 'Examples', 'Functions', 'Apps', 'Videos', and 'Answers'. The 'Answers' tab is selected. On the left side, there is a sidebar with a 'Category' dropdown menu. The selected category is 'Entering Commands'. Below it, there are sub-categories: 'Matrices and Arrays', 'Data Types', 'Operators and Elementary Operations', and 'Loops and Conditional Statements'. The main content area displays the search results for 'Entering Commands'. The first result is titled 'Print a statement to the Command Window' and has 3 answers. The second result is titled 'How do I comment out a large block of code in MATLAB?' and has 4 answers. The page also includes a 'Sort By' dropdown menu and a 'Ask the Community' link.

Accepted Answer

How do I comment out a large block of code in MATLAB?
I want to do this in an easy way. To comment out a large block of code in the Editor or Live Editor, select the code and on the "Editor" or "Live

Principles

- Shaping Documentation Content
 - Flexible and Convenient Accessing
 - Online documentation
 - Online help
 - Online tutorials and animated demonstrations
 - Online communities
- **Physical advantages:** Available whenever on web-connected electronic device, can't get lost or misplaced, physical workspace not needed, can be updated rapidly.
 - **Navigation features:** Can provide index and other search facilities, can link to other external materials and sources.
 - **Interactive services:** Can bookmark, annotate, and tag; can include graphics, sound, color, and animation; screen readers or other tools can be provided for users with disabilities.

Principles

- Shaping Documentation Content
- Flexible and Convenient Accessing
- Properly-Managed Production of Documentation
 - Production of any documentation, like any project, must be managed properly, handled by suitable personnel, and monitored with appropriate milestones
 - Guidelines

- Seek professional content writers and copywriters.
- Prepare user documentation early (before implementation).
- Set up guidelines documents and coordinate and integrate across all involved departments.
- Review drafts thoroughly.
- Field-test early editions.
- Provide feedback mechanisms for readers.
- Revise to reflect changes regularly.
