

Chapter 01 – Unwrapping the gift

Glossary

1. Artificial Intelligence (AI)

A type of computer system designed to do things that normally need human intelligence, like understanding language, recognizing patterns, or making decisions.

Example: Siri or Google Assistant.

2. Assistive Technology

Tools or devices that help people with disabilities do things more independently.

Example: A screen reader that reads text aloud for blind users.

3. Collaboration

Working together, often online, to create or improve something.

Example: Wikipedia articles are written by many volunteers.

4. Crowdfunding

Raising small amounts of money from many people online to fund a project or idea.

Example: Kickstarter or GoFundMe.

5. Defibrillator

A medical device that sends an electric shock to the heart to restore a normal heartbeat.

6. Deontological Ethics

An ethical theory that focuses on rules and duties. It says that some actions are always right or wrong, no matter the result.

Example: Always telling the truth, even if it causes problems.

7. E-commerce

Buying or selling things online.

Example: Amazon or eBay.

8. Encryption

A way to protect information by turning it into a code that only authorized people can read.

Example: When you shop online, your credit card info is encrypted.

9. Free Stuff (on the Web)

Software and services offered for free online.

Example: Gmail, Google Docs, Skype.

10. Kill Switch

A remote tool that lets a company or person disable or delete apps or data on someone's device.

Example: Google removing a harmful app from Android phones remotely.

11. Motion Sensors

Small devices that detect movement.

Example: A smartphone changes screen orientation when rotated.

12. Natural Rights

Basic rights people are born with, like life, freedom, and owning property. These rights don't depend on government rules.

13. Negative Rights (Liberties)

The right to do things without being stopped by others.

Example: Freedom of speech or religion.

14. Positive Rights (Claim Rights)

Rights that require others to provide us with certain things.

Example: Right to education or healthcare.

15. Privacy

The ability to keep your personal information and activities to yourself.

Example: Your search history or private messages.

16. Robotic Devices

Machines that can perform tasks automatically, often used in factories, homes, or hospitals.

Example: Roomba vacuum cleaner.

17. Act Utilitarianism

- **Focuses on individual actions.** An action is considered right if it produces **the most overall happiness** in that specific situation.
- You evaluate **each action separately**.

Example: Lying is okay if, in one situation, it prevents harm and leads to better results overall.

18. Rule Utilitarianism

- **Focuses on rules**, not single actions. An action is right if it **follows a rule** that, if everyone followed it, would create the most happiness.
- **Encourages long-term and consistent good outcomes.**

Example: You should not lie, even if it might help in one case, because if everyone lied, trust would break down and cause more harm.

19. Social Bots

Fake accounts on social media that act like real people using AI.

They can spread messages or collect data.

20. Social Networking

Online platforms where people connect, share updates, and communicate.

Example: Facebook, Instagram.

21. Telemedicine

Providing medical care from a distance using the internet or technology.

Example: A doctor checking a patient by video call.

22. Turing Test

A test to see if a computer can fool a human into thinking it's also human through conversation.

23. Utilitarianism

An ethical idea that an action is right if it brings the most happiness to the most people.

Example: Helping many people, even if it slightly harms one person.

24. Vigilantism

When people take law enforcement into their own hands without legal permission.

Example: Hackers exposing criminals without involving the police.

25. Web Logs (Blogs)

Online journals where people write about their opinions, news, or experiences.

26. Wikipedia

A free online encyclopedia that anyone can edit and update.

27. Golden Rule

A basic principle of ethics: "Treat others as you would want them to treat you."

28. Ethics

The study of what is right and wrong; moral principles that guide how we should behave.

29. Internet of Things (IoT)

Technology that allows everyday objects to connect to the internet and share information.

30. Robots

Machines that can perform physical tasks, sometimes automatically.
